Heart Rhythm 2021

The CHRS is pleased to report that the **HRS/CHRS/EHRA Joint Session: Recent Advances in CA of AF: Do We Now Have All the Answers?** is available on demand to all registered Heart Rhythm 2021 delegates .

This joint session will focus on the invasive management of AF with discussions on emerging technologies and strategies to improve the outcome of AF ablation procedures. The importance of appropriate patient selection will be emphasized. From a technological standpoint, the evidence supporting the use of recent technologies will be critically discussed. From a strategy standpoint, techniques to improve efficacy and safety of ablation procedures will be reviewed. Lastly, a discussion regarding the optimal approach and technique to improve outcomes for patients with persistent AF will be undertaken.

HRS has extended reduced early-bird rates for the duration of the Heart Rhythm 2021 - [click here](#) to register now.

As the national voice for Canadian heart rhythm physicians and scientists, the promotion of education is important to us! Please [contact us](#) and let us know if you are presenting at Heart Rhythm 2021. By providing this information, you give us permission to share this news with CHRS members.

2021 Joint Statement on the safety of MRI now published!

The Safety of Magnetic Resonance Imaging: a Joint Position Statement from the CCS/CanSCMR/CHRS is now published in CJC.

In this statement, the authors summarize contemporary knowledge for, and provide clinical recommendations surrounding, the safe use of MRI in cardiovascular patients with a targeted focus on contrast administration and the management of implantable electronic cardiac devices. It also provides a framework for healthcare providers to safely scan many patients with relative contraindications to MRI.
